### Pallet Quantity\*

Listed above are the standard number of drums per pallet. This is variable due to freight limitations to the various states.

### Dangerous Goods / UN Approval\*\*

Drums which are DG/UN Approved have been performance tested and have a DGA number and date of manufacture embossed on the top or base of the drum. These drums should only be used with the approved closure.

### Caution

Each product formulation is unique and it is the customer's responsibility to determine the compatibility of their products with the container used. We recommend extensive testing is carried out with the product and the preferred container.
